

**Commission on Animal Care and Control
Public Comment Responses – MAY 2019**

Q.	Do all CPD Stations have scanners and have all officers been trained?	A.	All CPD districts have microchip scanners. All officers were given the opportunity to be trained, and some were trained in all districts.
Q.	How many employees are there on each shift to clean and feed the animals?	A.	CACC has up to 3-5 staff on each shift to clean and feed the animals. CACC also has an agreement with the West Side Health Authority to provide full kennel cleaning and feeding of the animals from 7a-12p seven days per week. The West Side Health Authority has a staff of 21 workers who rotate through the program. If at any time, a volunteer notices that there is an animal without water, they are asked to notify the APC (or a front desk staff person to page the APC) of the situation.
Q.	Can CACC translate the Adoption Contract to Spanish for adopters?	A.	The City has a contract with a vendor who performs translation. CACC will request a quote to have this done to see if it is feasible.
Q.	Why are animals still going to rescues without foster homes? With 3 APC's why isn't CACC checking on the quality of life rather than a number?	A.	All rescue agencies are licensed through the Department of Agriculture. If there is a specific complaint about a rescue, including checking on the number of foster licenses, please contact them at (217) 782-2172.
