JUSTIFICATION FOR NON-COMPETITIVE PROCUREMENT

COMPLETE THIS SECTION IF NEW CONTRACT

For contract(s) in this request, answer applicable questions in each of the 4 major subject areas below in accordance with the Instructions for Preparation of Non-Competitive Procurement Form on the reverse side.

Request that negotiations be conducted only with CERNER (Name of Person or Firm) for the product and/or services described herein.

This is a request for _____ (One-Time Contractor Requisition # 3049, copy attached) or _____ Term Agreement or _____ Delegate Agency (Check one). If Delegate Agency, this request is for "blanket approval" of all contracts within the _____ (Attach List) Pre-Assigned Specification No. _____
CHICAGO DEPT. OF PUBLIC HEALTH (Program Name) Pre-Assigned Contract No. _____

COMPLETE THIS SECTION IF AMENDMENT OR MODIFICATION TO CONTRACT

Describe in detail the change in terms of dollars, time period, scope of services, etc., its relationship to the original contract and the specific reasons for the change. Indicate both the original and the adjusted contract amount and/or expiration date with this change, as applicable. Attach copy of all supporting documents. Request approval for a contract amendment or modification to the following:

Contract #: _____ Company or Agency Name: _____
 Specification #: _____ Contract or Program Description: _____
 Mod. #: _____ (Attach List, if multiple)

SCOPE STATEMENT

Attached are a **Detailed Scope of Services** and/or **Specification(s)**.

IMPORTANT: THIS IS A CRITICAL PORTION OF YOUR SUBMITTAL. IN ORDER FOR DPS TO ACCEPT YOUR SUBMITTAL YOU MUST COMPLETE THE SPECIFIC SCOPE REQUIREMENTS AS SET FORTH IN THE SUPPLEMENTAL CHECKLIST FOR THAT UNIT.

The following is a general description of what should be included in a **Scope of Services or Specification:**

A clear description of all anticipated services and products, include: timeframe for completion, special qualifications of prospective vendors, special requirements or needs of the project, locations, anticipated participating user departments, citation of any applicable City ordinance or state/federal regulation or statute.

TYPE OF PROCUREMENT REQUESTED (check all that apply)

NEW REQUEST

- Blanket Agreement
- Standard Agreement
- Small Orders

MOD/AMENDMENT

- Time Extension
- Vendor Limit Increase
- Scope Change/Price Increase/Additional Line Item(s)
- Other (specify): _____

FORMS: Requisition Special Approvals Non-Competitive Review Board (NCRB)

CONTRACT TERM: 5 yrs Requested Term (number of months): 60 Months

DPS PROJECT CHECKLIST

PRE BID/SUBMITTAL REQUIREMENTS:

Requesting Pre Bid/Submittal Conference? Yes No Requesting Site Visit? Yes No

ARCHITECTURAL/ENGINEERING SUPPLEMENTAL CHECKLIST

Required Attachment: Scope of Services, including location, description of project, services required, deliverables, and other information as required.

Risk Management

Will services be performed within 50 feet of CTA train or other railroad property? Yes No
Will services be performed on or near a waterway? Yes No

If applicable, Pre-Qualification Category #: _____ Category Description: _____

For Pre-Qualification Program, attach list of suggested firms to be solicited

Other Agency concurrence Required: None State Federal Other (fill in)

AVIATION CONSTRUCTION SUPPLEMENTAL CHECKLIST

DOA sign-off for final design documents: Yes No

Required Attachments:

Copy of Draft Contract Documents and Detailed Specifications.

Risk Management:

Current Insurance Requirements prepared/approved by Risk Management: Yes No
Will work be performed within 50 feet of CTA or ATS structure or property? Yes No
Will work be performed airside? Yes No

*NOTE: Any non-construction Aviation request, complete the applicable section.

COMMODITIES SUPPLEMENTAL CHECKLIST

Required Attachments: Detailed Specifications (Scope of Services) including description of the product, delivery location, user department contract, price escalation considerations, Bidder's qualification, contract term and extension options, Contractor's qualifications, citation of any applicable City/State/Federal statutes or regulations, citation of any applicable technical standards and Price Lists/Catalogs, technical drawings and other exhibits and attachments as appropriate.

If Modification request, please verify and provide the following:

Contractor's Name: CERNER

Contractor's Address:

Contractor's E-mail Address: jgoodwin@cerner.com

Contractor's Phone Number: 816-208-4116

Contractor's Contact Person: JOHN GOODWIN

CONSTRUCTION SUPPLEMENTAL CHECKLIST

Required attachments:

Copy of Draft (80% Completion), Contract Documents and Detailed Specifications

Risk Management

Will services be performed within 50 feet of CTA train or other railroad property? Yes No
Will services be performed on or near a waterway? Yes No

DPS PROJECT CHECKLIST

WORK SERVICES/FACILITY MAINTENANCE SUPPLEMENTAL CHECKLIST

Required Attachments: Detailed Specifications (Scope of Services) including detailed description of the work, locations (with supporting detailed), user department contacts, work hours/days, laborer/supervisor mix, compensation and price escalation considerations, Bidder's qualification, contract term and extension options, Contractor's qualifications, citation of any applicable City/State/Federal statutes or regulations, citation of any applicable technical standards and Price Lists/Catalogs, technical drawings and other exhibits and attachments as appropriate.

Risk Management:

Will services be performed within 50 feet (50') of CTA train or other railroad property? Yes No

Will services be performed on or near a waterway? Yes No

Will services require the handling of hazardous/bio-waste material? Yes No

Will services require the blocking of streets or sidewalks which may affect public safety? Yes No

If Modification or Amendment request, please verify and provide the following:

Contractor's Name:

Contractor's Address:

Contractor's E-mail Address:

Contractor's Phone Number:

Contractor's Contact Person

Cerner RIS/PACS

There is significant advantage to utilizing current CHAMPS system as the foundation for RIS/PACS information management and image delivery. In summary, RIS/PACS will leverage the prior financial and operational investments made in CHAMPS solution. The integration of the two systems occurs without the need to build and manage additional interfaces.

Financial Savings:

- Runs on the same Hardware currently in place for CHAMPS
- Fewer Professional Service fees are required because the same build foundation that was created for the CHAMPS project will be utilized for RIS/PACS
- Eliminates the need for additional interface licensing and technical support. RIS/PACS will utilize the same database as CHAMPS
- Eliminates the need to hire additional interface personnel to support and maintain interfaces between Cerner and a non-Cerner system

Operational Efficiencies:

- Training is streamlined because end users will interaction is intuitive. The RIS/PACS 'looks and feels' very similar to CHAMPS
- Single point of support for all system issues (one number, one organization) for CHAMPS and RIS/PACS

Patient Safety Benefits:

- The system access permits physicians to view PACS images directly from CHAMPS without the need for interfaces
- Patients information collected will be available for clinician and/or billing review – one medical record.

Sole Source Lagunage

Unique features (i.e. special functionality) of the requested product(s) or vendor:

- (1) The requested product or services perform a significant function or provide a service for which no other product or source of services exists;
- (2) Agency/institution has a business need for these unique functions of services; and
- (3) There are no other parties who could provide the product or services.

Unique Features for Cerner RIS/PACS Defense

RIS/PACS System:

1. Mission critical infrastructure

- Infrastructure including the CHAMPS (Chicago Health Accounting and Medical Practice System) that is already built for the implementation of CDPH Center operations. This includes the Core Fundamentals of the database; security and access; System Monitoring, and all master data files including Payors, Employers, Eligibility, Medical Records.
- RIS/PACS will leverage the prior financial and operational investments made for the CHAMPS solution today without the need to incur the expense and the resource to create and maintain additionally system to system interfaces.
- Data center hosting, operational management and contractual service performance level commitments from the current master agreement are in common with those for CHAMPS, significantly reducing the need for additional CDPH technical training.
- The Network and bandwidth already configured to support CHAMPS production capabilities of the clinic operations will be used to review radiology consult reports and with minimal changes (i.e., earmarked devices) are the same.
- Leverages the CHAMPS support structure to provide mission critical help desk functions

2. Integrated data model

- CHAMPS data drives the integrated radiology system, which leverages the same core systems application build and functionality, eliminating the need to re-build or re-collect the same information.
- Integrated Radiologist reporting applications are included without interfaces supporting paperless operations.
- ProVision Web allows CDPH authorized physicians to view images stored in CHAMPS. This is the only vendor software solution that allows physicians to directly view images within the context of the patient without the development and management of additional interfaces.
- Acquisition of CR images for mammography and general x-ray will be provided by FDA approved readers from FUJIFILM Medical Systems. CR images populate RIS, PACS and ProVision Web systems

3. One patient record is utilized for all CDPH staff and patients

- RIS/PACS will utilize the history of patient orders and results embedded within CHAMPS today

- Leverages wellness schedules (example mammography) during the clinician visits to inform patient/client of wellness and screening needs.
- 4. Leverage commercially available solution**
- Quicker responses to impending regulatory changes
 - Reduced outlay of operating cash
 - System reliability and SLA
- 5. End user interface**
- Streamlined end user training and operations due to the fact that end users will be utilizing a common front end for CHAMPS and RIS/PACS
- 6. Integration and Real Time Availability**
- Cerner Electronic Health Record (EHR) information is immediately available to Radiology Technologist when the CDPH provider places the order, eliminating the need for paper referrals for CDPH patients
 - Full integration with EHR – no additional interface requirements
 - Results and patient compliance with provider instructions is immediately knowable to the CDPH physician of record. The ordering information and results are stored in the patient EHR and readily available for current or historical viewing and trending.
 - Ability to leverage existing data warehouse and mine (evaluate) data to enable reporting (ex.: grant matching criteria and population selection)

PROJECT AGREEMENT
ATTACHMENT A - SOLUTION IMPLEMENTATION SCOPE DEFINITION

GO-LIVE SOFTWARE VERSION - FOR THE PURPOSES OF THIS PROJECT IMPLEMENTATION, CLIENT WILL CONVERT THOSE SOLUTIONS

FOUNDATIONS

CORE

Foundations refer to Cerner's definition of those common processes or tasks that are shared across clinical and administrative domains and applications, technical areas, and project or production tasks. Foundations are included in all major Cerner licensed software.

Personnel	<ul style="list-style-type: none"> All personnel will be added as users for the areas being automated
Security	<ul style="list-style-type: none"> Security Profiles from within the START Content will be utilized. The following is a detailed list of the positions included in START: <ul style="list-style-type: none"> Up to 9 Radiology positions (Diagnostic Imaging Users) <ul style="list-style-type: none"> Service Resource Security for RadNet implementations only Radiology users will be assigned access to all service resources within their primary physical working location If a solution is not in scope for the implementation, the positions allocated above for that solution CANNOT be reused for the 'in scope' solutions. If additional positions are required, this will require additional professional services and fees Additional detailed service resource security can be implemented for additional professional services and fees
Standard Code Sets	<ul style="list-style-type: none"> Standard scope supports Cerner's START Content (e.g., standard hospital service) Values not in START or in current use may be added
Standard Reports & Audits	<ul style="list-style-type: none"> Standard scope supports any reports from the Standard Reports Library accessed at Cerner.com
CMT™ (Controlled Medical Terminology)	<ul style="list-style-type: none"> START Content includes the most recent reference and medical vocabulary Standard scope supports yearly update files for currently available terminologies
Interfaced Code Set Aliasing	<ul style="list-style-type: none"> Build inbound and outbound aliases from Client input on a data collection worksheet detailing the necessary translations per data element (HL7 segment) per interface
Organizations	<ul style="list-style-type: none"> Standard scope supports the build of all Client Organizations based on the areas being automated and can include the following: <ul style="list-style-type: none"> Employers Hospitals Insurance Companies/Health Plans Physician Practices, Clinics or Health Centers References Labs Pharmacies
Locations	<ul style="list-style-type: none"> Standard scope supports the build of all Locations based on areas being automated and can include the following: <ul style="list-style-type: none"> Nursing Stations Rooms Beds Internal department locations as required by solutions being implemented Ambulatory locations Exam Rooms for patient tracking locations Services Areas Inventory locations
Alias Pools	<ul style="list-style-type: none"> Standard scope supports the build of Alias Pools as appropriate based on areas being automated. These may include the community medical record number,

CHICAGO DEPARTMENT OF PUBLIC HEALTH

PROJECT AGREEMENT
ATTACHMENT A – SOLUTION IMPLEMENTATION SCOPE DEFINITION

	<p>medical record number, social security number, visit number, financial number, personnel identifiers, and orders identifiers</p> <ul style="list-style-type: none"> Standard scope supports the build of 30 provider groups. This can include clinic/physician office groups and acute care groups (i.e. Attending physicians)
Provider Groups	
Event Codes and Event Sets	<ul style="list-style-type: none"> All Event Codes and Event Sets as provided in START will be utilized based on solution scope, including Event Codes from the Microbiology Order Catalog, Anatomic Pathology Order Catalog, Radiology Order Catalog, and Laboratory Discrete Task Assays. This includes implementations using these event codes through a Cerner Millennium solution or an interface Medications including Immunizations for both acute care and ambulatory settings Nursing/PowerForm documentation
General Document Event Codes	<ul style="list-style-type: none"> All document types as provided in START will be utilized
Basic Registration	<ul style="list-style-type: none"> Standard scope supports use of Cerner's Patient Management HNA Registration conversations from the START Content. The Client can choose one customized design of one of the following conversations: <ul style="list-style-type: none"> PMHNAReg (add/modify/view persons and encounters, full registration) PMCoreReg (add/modify/view persons and encounters, limited registration) PMCoreReg Person (add/modify person) Rules that can be instituted within the registration conversations are not considered to be in scope. Rules that can be instituted within the registration conversations are not considered to be in scope. If the Client wishes to institute rules with the conversations listed above, additional professional services and fees are required Interfield Rules – includes only those rules included in the standard library. Custom rules can be implemented for additional professional services and fees
Preferences	<ul style="list-style-type: none"> Standard preferences as appropriate for the Client organization based on solution scope can include any or all of the following: <ul style="list-style-type: none"> Message Center Rounds List Patient List Schedule Clinical Notes Result Flowsheets (See PowerChart scope for complete list) Problem List Allergy Profile Medications Profile Immunizations Encounter History Forms Browser
CHARGE SERVICES	
Charge Capture	<ul style="list-style-type: none"> Standard scope supports charge capture for the following: <ul style="list-style-type: none"> Add-on Charges Batch Charge Entry Miscellaneous Charges Manual Charges CPT4 Codes for Advance Beneficiary Notice (ABN Checking) Orders and tasks with multiple trigger points for the charge Radiology: <ul style="list-style-type: none"> Charge capture at exam completion for the following: <ul style="list-style-type: none"> Technical component Bill Only items Option to hold technical fees until exam is electronically signed
Bill Code Schedules and Tiers	<ul style="list-style-type: none"> Cerner supports the addition of bill code schedules and price schedules per orderable selecting from: <ul style="list-style-type: none"> CDM Schedule per facility

PROJECT AGREEMENT
ATTACHMENT A – SOLUTION IMPLEMENTATION SCOPE DEFINITION

	<ul style="list-style-type: none"> • CPT4 Codes (license required) • CPT4 Modifiers • ICD9 Codes • HCPCS when ProFit is implemented in same phase • Revenue Codes when ProFit is implemented in same phase • Adding schedules (bill codes and prices) against Cerner recommendations for the site will require additional professional services and fees • Charge Suspense Logic: <ul style="list-style-type: none"> • 1 Tier per facility for Technical Charges to include technical component charge capture only • Cost Centers will be included in tiering logic if required by foreign billing system • If ProFit is not being implemented, the current foreign billing system must be utilized for professional billing for Anatomic Pathology, Radiology, and/or Emergency Department. Implementing professional fees without ProFit will require additional professional services and fees, including additional tier groups per facility, interface files, and bill codes/price schedules
Billing File	<ul style="list-style-type: none"> • Standard Scope supports creation of 1 billing file with all charges • File delivery to Client's billing system is Client responsibility
CLINICAL REPORTING	
<p>Clinical Reporting is Cerner's solution for initiating and processing clinical reports. A clinical report (chart) is a document containing patient demographic and clinical result information. Clinical Reporting draws information entered throughout Cerner Millennium to print on reports generated by manual and automated processes.</p> <p>Clinical Reporting chart sections currently support the following content:</p> <ul style="list-style-type: none"> • Discrete data such as General Lab results, HeliX, and Direct Charting (including Interactive View) print in the following chart sections: Vertical, Vertical Flowsheet, Vertical Enhanced Layout, Horizontal, Horizontal Flowsheet, Horizontal Enhanced Layout, and Zonal. • Additional departmental chart sections include: Laboratory Text, Blood Bank Crossmatch and Transfusion Summary (Flex), Microbiology, Anatomic Pathology, HLA (Human Leukocyte Antigen), and Radiology. • Patient Care content uses the following chart sections: Document chart sections (Clinical Notes, Power Notes, and Scanned documents – both Encounter and Person Level documents and SurgiNet). PowerForms, Medication Administration Record, Intake and Output, Medication Profile Historical, Immunization, Allergy List, Problem List, Procedure History, Care Plan, Health Maintenance (Pending, Pending Next, Satisfied, Satisfied All). • Other specific chart sections include: Orders, Order Summary, Name History, Encounter Comment, and Cross Encounter Summary and Endorse Comment. <p>Clinical Reporting does NOT currently support the following chart section content: Pediatric Growth Chart, Diagnosis, SurgiNet Anesthesia, and Done/Not Done Charted Tasks</p>	
Chart Formats	<ul style="list-style-type: none"> • Radiology (Diagnostic Imaging): <ul style="list-style-type: none"> • 2 Formats-PB may be able to do just • For multiple solution implementations, the total number of chart formats should be reflective of the solutions being implemented. There will be zero additional chart formats for additional facilities as the chart formats above should be standard across all facilities
Chart Distributions	<ul style="list-style-type: none"> • Radiology (Diagnostic Imaging) Distributions: <ul style="list-style-type: none"> • 1 Outpatient Physician Copy • 1 Professional Billing Office Copy • 1 Additional Distribution
Expedite Clinical Reporting	<ul style="list-style-type: none"> • Radiology Imaging Distributions: <ul style="list-style-type: none"> • Up to 2 total expedites
PRINTERS & REMOTE REPORT DISTRIBUTION	
Printer Definitions	<ul style="list-style-type: none"> • Includes up to 150 printers per facility. For solution specific scope, refer to the solution/functional area within the current scope document • Client can create additional printers without Cerner assistance as needed in collaboration with the Cerner team as it relates to scope

CHICAGO DEPARTMENT OF PUBLIC HEALTH

PROJECT AGREEMENT
ATTACHMENT A – SOLUTION IMPLEMENTATION SCOPE DEFINITION

Remote Report Distribution	<ul style="list-style-type: none"> • Includes up to 200 fax locations • 200 device cross references • 1 time schemes • Client can create additional fax locations, cross references, and time schemes without Cerner assistance as needed in collaboration with the Cerner team as it relates to scope
DISCERN EXPERT	
<p>Cerner's Discern Expert is event driven and rule based, continuously monitors patients' electronic medical records, reminding clinicians of routine care actions and alerting them when unusual situations arise. The tool uses essential data elements such as patient age, gender, weight, prescribed medications, diagnoses, lab results, clinical studies and standard regimens in conjunction with the industry knowledge it contains to power the decision making process. The rules engine fires alerts to notify clinicians of clinical, financial, or other errors or important information.</p>	
Expert	<ul style="list-style-type: none"> • Standard scope supports implementing 5 rules from the Discern Expert Report Library per licensed solution where applicable • Collaborative support and transfer of knowledge regarding the principles needed to design and manage alerts • This includes designing and managing the altered processes and communication needed for transition to the use of the decision support tools
DISCERN EXPLORER	
<p>Cerner's Discern Explorer is a full-featured, fourth-generation, and English-like procedural language used to maintain and extract data from both Cerner Health Network Architecture (HNA) and Client-developed databases.</p>	
Explorer	<ul style="list-style-type: none"> • Cerner provides Learning Services to instruct the Client on the use of Explorer • There are a number of predefined reports that are available to the Client • The Discern Expert Report Library can be accessed through Cerner.com

MULTIMEDIA FOUNDATION INFORMATION SYSTEM

MULTIMEDIA FOUNDATION	
<p>Cerner MultiMedia Foundation (MMF) provides a computer-based centralized object repository for DICOM and non-DICOM image objects to facilitate replacement of manual processing and management of an Enterprise's film and paper. The following scope of work represents Cerner work effort to implement 2 servers, 1 workstations at 1 locations, and connect 5 modalities and 0 legacy imaging servers in 1 Phases.</p>	
<p>Rollout of additional nodes or locations beyond those listed will be the responsibility of the Client.</p>	
<p>It is assumed the Client identifies a PACS Administrator and Trainer for training Clinical staff with the exception of the Radiologists or Cardiologists in which one-on-one training is offered.</p>	
<p>Additional Cerner Support required will result in additional professional services and fees.</p>	
CERNER IMAGING DETAILED SCOPE DESCRIPTION	
ProVition MMF Server(s) for Archive Architecture	<ul style="list-style-type: none"> • Installation and initial configuration of up to 2 MMF server(s) supporting the archiving of MMF images with lossless compression • Initial database sizing and configuration • Initial image cache configuration for short term storage and access • Initial configuration of long term image storage and access • Connection of 5 modalities supporting DICOM store to the MMF archive architecture <ul style="list-style-type: none"> • All modalities must comply with DICOM_3 standards for image storage to be considered in scope
Test Archive	<ul style="list-style-type: none"> • Connection of 0 Legacy Imaging servers to the MMF Archive architecture • Installation and initial configuration of a Test Archive
High-Availability	<ul style="list-style-type: none"> • Connection of up to 5 modalities to Test Archive • Production Server High Availability

CHICAGO DEPARTMENT OF PUBLIC HEALTH

PROJECT AGREEMENT
ATTACHMENT A – SOLUTION IMPLEMENTATION SCOPE DEFINITION

Study Validation	<ul style="list-style-type: none"> • Test Server High Availability • Configuration for study validation supporting 5 DICOM modalities • Cerner will perform the initial build for the auto-match criteria • Client is responsible for modifications or additional modalities (add-on's) to the auto-match criteria post conversion • This includes building Exam Management-ProVision Web integration to support Technologist workflow
TSM Backup	<ul style="list-style-type: none"> • Production Archive Long term Image Store backup • Refer to the TSM Scope for full scope of service
Workflows	<ul style="list-style-type: none"> • Cerner will assist Client with the definition of future state workflows using a common set of best-practice process diagrams • Definition of additional workflows by the Client must not affect project timelines • Configuration of PACS-centric pre-fetching rules (if applicable)
PACS Workstations	<ul style="list-style-type: none"> • Installation and initial configuration of 1 Diagnostic Report workstations and 0 Clinical Review workstations • Includes installation of hardware, software, and initial monitor calibration • Default Viewing Protocols are provided • Network Roaming profiles are recommended to propagate the preferences to multiple workstations as changes are made to the radiologist preference both pre- and post-conversion • A primary domain controller with roaming policies and profiles is the responsibility of the Client to implement and manage
RDT/CRDT Integration	<ul style="list-style-type: none"> • Cerner will configure each workstation identified in the "PACS Workstation" section, supporting the integration of RadNet RDT with the PACS image viewer application
Mammography Workstation	<ul style="list-style-type: none"> • Installation and initial configuration of 1 Mammography workstations • Includes installation of hardware, software, and initial monitor calibration • Network Roaming profiles are recommended to propagate the preferences to multiple workstations as changes are made to the radiologist preference both pre- and post-conversion • A primary domain controller with roaming policies and profiles is the responsibility of the Client to implement and manage
CD Burner Workstation	<ul style="list-style-type: none"> • Up to 4 hours total of Mammo functionality training • Installation and initial configuration of 1 CD Burner workstations • Cerner will train Super Users on creating CD's and the basic features of the CD Burner workstation
CERNER PROVISION WEB	
Cerner ProVision Web is a web-based, image distribution solution that quickly provides secure access to images stored in MMF via the internet or hospital intranet.	
ProVision Web with MMF	<ul style="list-style-type: none"> • Cerner ProVision Web resides on the MMF server architecture • The Cerner ProVision Web solution is configurable for either thin or slim environments • Thin configuration involves an existing Citrix environment which should be evaluated for Image Distribution prior to project initiation. Services for potential Citrix environment upgrades are not included in this scope of work. Thin configuration is restricted when Cerner ProVision Web is implemented in a remote hosted option (RHO) • Slim configuration requires viewing images through a web browser and individual PC configurations • Services Scope includes loading PVWeb on one Thin and one Slim Client for Test purposes to determine best delivery configuration • Client is responsible for enterprise wide deployment of selected configuration • The training format for ProVision Web is Super User style training - 8 hours of training for Super User

PROJECT AGREEMENT
ATTACHMENT A – SOLUTION IMPLEMENTATION SCOPE DEFINITION

INTEGRATION OF CERNER PROVISION WEB AND POWERCHART

Through PowerChart's EMR (electronic medical record) integration of ProVision Web and PowerChart is designed to deliver images within the physician's normal workflow. ProVision Web offers single-click contextual access within the PowerChart EMR Flowsheet. With Cerner ProVision Web, there is no need to log into a different application, search for the patient, or use a foreign interface. Cerner ProVision Web optimizes physician workflow by image-enabling the EMR. The following scope of work represents Cerner work effort to integrate ProVision Web with PowerChart for Radiology or Cardiology.

PowerChart Integration

- Cerner will integrate the ProVision Web solution with PowerChart / PowerChart Office
- Integration to Cardiology requires proper licensure of Clinical Data Repository

CERNER MODALITY WORKLIST

Cerner Modality Worklist is a supporting Cerner offering that operates along with separate licensure of RadNet's Radiology Management and provides native DICOM services for use in a PACS environment. Worklist Manager provides enhanced DICOM services to support DICOM Modality Worklist and Modality Performed Procedure Step. The power of the coupling RadNet with Cerner ProVision PACS architecture allows seamless integration of centralized worklist management into filmless and film-based environments without a requirement for an external "broker" and its associated interfaces.

The following scope of work represents Cerner work effort to implement Cerner Modality Worklist.

Cerner Modality Worklist

- Client will provide coordination of Modality suppliers
- Installation and initial configuration of the Modality Worklist Server including layered software and configuration of the Service Class Provider
- Worklist configuration for 5 DICOM modalities
 - To be considered in the scope of the project, the modality must conform to the DICOM Standard for Modality Worklist and be licensed with worklist software supplied from the modality vendor no later than 8 weeks prior to the mutually agreed upon conversion date
- Client will be instructed on how to Design and Build MWL and will implement all modalities not completed within the agreed-upon project duration
- Changes or upgrades to the modality software can adversely affect the modality worklist functionality. These changes / upgrades are considered the responsibility of the Client to manage
- Assumption regarding end user training for modality worklist:
 - The modality worklist software running at the modality is not software provided by Cerner. Client modality supplier should provide end-user training for utilizing the worklist at the scanner. Modality vendors often have a varied look and feel to the worklist software, and data that displays in the worklist can vary for different modalities. For these reasons, it is important to request modality worklist training from your modality vendor

RADNET RADIOLOGY INFORMATION SYSTEM

RADIOLOGY MANAGEMENT

Radiology Management – Cerner Millennium is a major RadNet offering designed for managing the workflow and operation of a radiology department. The solution fully automates the following Radiology orders, film management, exam tracking, study interpretation, transcription, and result processing.

General

- Departments – Up to 2 Departments per scoped facility will be included in this implementation
- Modality (also known as a Section) - Up to 2 Modalities/Sections per department will be included in this implementation

CHICAGO DEPARTMENT OF PUBLIC HEALTH

PROJECT AGREEMENT
ATTACHMENT A – SOLUTION IMPLEMENTATION SCOPE DEFINITION

<p>Department Security/Service Resource Security</p>	<ul style="list-style-type: none"> • Exam Rooms specific build per facility • For multiple department or multiple facility implementations, this security can be implemented • Radiology users will be assigned access to all Worklists and exam rooms within their primary physical working location (primary department) • Requested modifications to standard scope will be evaluated for potential impact to the project plan and may require additional professional services and fees
<p>Work assignment</p>	<ul style="list-style-type: none"> • Orders - Standard scope supports orderables from Cerner's START Content for Radiology • Additions of up to 50 Client specific orderables • Virtual viewing of Radiology orders will be the Registration Management at the orderable level, for each facility • Order Entry Formats -Standard scope supports up to 10 order entry formats to include the format within Cerner's START Content • Reason for Exam - Includes no more than 1000 Client defined and order associated reasons for exam for the scope of project • Patient Packet - Includes 1 patient packet chosen from a standard catalog of patient packets for the organization to be used as a template with changes available as approved by the Solution Architect • Once the Patient Packet has been created, the Client will own the content and format post conversion <ul style="list-style-type: none"> • Training for the Patient Packet tool for Client modification is not included • Included in the patient packet are the following: <ul style="list-style-type: none"> • Content Labels • Flash Cards • Film Folder Labels • Transport Notice • Requisition
<p>Work Assignment/Study Preparation and Exam</p>	<ul style="list-style-type: none"> • Radiology Notices, Rules, and Alerts: Includes activation of the following notices, rules, alerts listed below using Discern Expert • Radiology Preliminary Report for Emergency Department: Includes 1 printed form to document a preliminary report when a radiology order is placed on an ED patient type. This form can be used by clinician to document findings and also for the radiologist to verify or disagree with the ED clinician finding. The Client will the Registration Management where this form is printed based on location. This will be implemented for 1 department • Generic Radiology Consent Form: Includes 1 generic procedure consent form to print at order time to a department printer for exams that require consent. START Content includes association of orders with this consent form. Additional orders can be associated by the Client within the data collection. This will be implemented for 1 department • Radiology Iodine Allergy Alert: Includes online alert to the modality specific PC workstation when an order is placed on a patient with a documented allergy in Cerner Millennium to iodinated radio contrast media and/or iodamide. This will be implemented for 1 department • Radiology Latex Allergy Alert: Includes online alert to the modality specific PC workstation when an order is placed on a patient with a documented allergy in Cerner Millennium to latex. This will be implemented for 1 department • Order Notice: Includes 1 printed order notice to route to a specific printer per facility. Order notices are an additional notification beyond the requisition that you may wish to use to notify an area that an exam has been ordered • Radiology Intravenous Contrast Consent Form: Includes an Intravenous

Scope of Use Summary:

Solution	Scope Matrix	Usage Description
Learning Services	Each	
Multi-Media Foundation	Admissions + Outpatient Visits	253,000 Sum of annual admissions plus the annual outpatient visits, whereas an outpatient visit is defined as a visit by a patient who either receives ambulatory services or is lodged in the hospital less than 24 hours while receiving medical, dental, or other services.
Multi-Media Foundation	Radiology Procedures	10,438 Total number of annual orderable radiology procedures.
RadNet	Radiology Procedures	10,438 Total number of annual orderable radiology procedures.

Special Notes:

Note: The information contained in this quote is for budgetary purposes only and is not considered final or binding.

Quote Assumptions:

Quote: Professional Services RIS/PACS

Assumption: This Professional Services Estimate (PSE) assumes the Cerner Millennium® 2007 Cumulative Production Packages. The work effort presented in this PSE is based on MethodM, Cerner's structured implementation approach. The MethodM fee includes, but is not limited to, the MethodM Project Plan, Design Guides, Build Guides, and Validation Guides. All solution work effort has been validated through an ongoing, quality and regulatory control process. This PSE assumes any Upgrade requirements will be performed prior to this project start date. If existing Millennium Client, current revision levels in PROD must be assessed by the Upgrade Center. This PSE assumes the Design, Build, and Conversion of 1 facility/facilities utilizing a centralized database environment and a Big Bang implementation approach. Modifications to the Design and Build of the proposed solutions to meet specifications for individual facilities, will result in additional professional services fees. This PSE includes the work effort required for adding newly built reference data into the PROD domain. This is known as the Reference Data Domain Sync (RDDS) process. **Client Detail:** Assume PowerChart (2007) including Registration Management, Scheduling Management, Billing & Accounts Receivable, ClinDoc, Single Document Scanning, and all necessary interfaces are live and functional prior to this project. **Phase 1 (20 weeks):** Radiology Management, Departmental Scheduling Management, PACS for Radiology, ProVision Web for Radiology

133 S State St
Chicago, IL 60604 USA

Expiration Date: 12-Dec-2007

Technology - OMS

OMS Services included: (Term to coincide with RHO Schedule)

System Monitoring and Management
Database Monitoring and Management
Administration

Domains (Supported by OMS)

- (1) Production domains supported (Millennium)(PACS)
- (1) Non-production domains supported (Millennium)(PACS Test)

PACS machines (On which in-scope domains are running)

- (1) HP ProLiant DL380 G5 1-way Dual Core - Modality Worklist Server
- (1) HP ProLiant DL380 G5 1-way Dual Core - Test Server
- (1) HP ProLiant DL380 G5 2-way Dual Core - Provision Server

PACS operating systems and database platform

Linux, Microsoft Windows Server, and Oracle

Applications:

Cerner ProVision™ PACS

Connectivity from Cerner to Client Site:

Existing RHO Frame Relay Circuit

Additional Assumptions

- BMC Patrol in conjunction with the Cerner KM's must be fully implemented across the Cerner ProVision™ PACS environment in order to monitor the operating system, database, or application environment.
- Cerner will provide use of BMC licenses and implement BMC Patrol in conjunction with the Cerner KM's on supported Cerner ProVision™ PACS machines.
- Cerner will retain ownership of BMC licenses. Cerner owned BMC licenses will be removed on termination of OMS services.
- Client manages workstations, diagnostic workstations, and peripherals.
- In addition to fees above, Client will reimburse Cerner for travel costs incurred in conjunction with performance of OMS services.
- One-time fee due upon execution
- Monthly fees begin upon agreement signing
- Mentoring not included in pricing

(1-941303081-R-2)

Technology - RHO (RudNet Add-On)

Note - Quoted RHO Fees are in addition to base or currently contracted RHO Fees.

Add-on Applications:

RudNet (Radiology Mgt.)

Note - RHO Quote does not include Clinical Imaging solutions such as PACS or ProVision Web.

Additional Assumptions:

- One-time fee due upon execution and Monthly fees begin upon agreement signing
- RHO fees for adding the application only. If the addition of these applications results in additional concurrent logons and the necessity to expand the concurrent logon scope limit, there would be additional Concurrent Logon Scope expansion fees.
