

Traffic Management Plan Chicago Tribune and U-Haul Demolition

Prepared by Brandenburg Industrial Service Company

For

CCBC

Traffic Management Plan

Listed below are traffic controls that will be utilized to provide our demolition project a minimal impact on the surrounding community. As per our contract submittals, the following is Brandenburg's Traffic Management Plan for the above captioned demolition contract:

1. Monday-Friday truck traffic will be focused from 9am – 4pm to avoid the morning and afternoon commuter rush hours. Once trucks are on-site, they will be on private property and not in the public right of way.
2. Weekends will be used for heavy hauling and will limit truck traffic from 8:00am – 8:00pm.
3. Traffic entrance and exit as noted in the attached diagram (please note, barging material as shown, is not an option at this point). If more entrances and access become available, Brandenburg will consider editing said plan.
4. Brandenburg has a scale set up onsite and random trucks leaving the site will be weighed to verify optimal capacity and to adhere to city trucking load limits.
5. This plan will be modified as conditions in the field dictate.
