This will be the most modern recycling facility in the entire Midwest. If this facility is denied a permit, all recycling will go to other facilities, which do not have any of the environmental controls that Southside Recycling will use. This new facility should be embraced by Chicago and its metal recyclers.

Subject: Please deny General Iron's final permit request

[Warning: External email]

Dear Environmental Permitting and Inspections,

I'm writing to demand that the City of Chicago deny the remaining Class IVB Large Recycling Facility Application permit needed for RMG to operate their scrap metal recycler, formerly known as General Iron, at their new location 11600 S Burley Avenue in the Southeast Side.

At the end of last year, the City responded to RMG's final permit application with a letter of deficiency. I wholly agree with this response. RMG's permit application is "substantially deficient." The deficiency letter underscores why the community and the City cannot trust that RMG will operate a new facility at the 11600 S. Burley site safely and that CDPH must not grant a permit to RMG for the new incarnation of General Iron on the Southeast Side. RMG has now resubmitted their permit, but the problems and threats to the surrounding community are still there. The city therefore must deny this new permit in order to protect the health and well being of the neighborhood.

During General Iron's tenure in Lincoln Park, they proved time and again that they are not a good neighbor with fires & explosions, City shut-downs, coating the neighborhood in toxic "fluff" and federal EPA citations. There is no reason to believe moving to a new neighborhood will put an end to these harmful practices.

The Southeast side is already environmentally overburdened, with manganese, petcoke and landfill pollution already impacting the health and safety of residents, and we must not continue to use the neighborhood as the City's dumping ground.

The Mayor promised environmental justice. To approve this move would be an injustice to the Southeast side. The City promised the Southeast side transparency, but passed one of two City permits without informing residents. It's time to follow through on these promises and protect all the Chicago communities, not just those on the Northside.

Thank you for your consideration,

Sincerely,
Lesley January

Subject: Please deny General Iron's final permit request

[Warning: External email]

Dear Environmental Permitting and Inspections,

I'm writing to demand that the City of Chicago deny the remaining Class IVB Large Recycling Facility Application permit needed for RMG to operate their scrap metal recycler, formerly known as General Iron, at their new location 11600 S Burley Avenue in the Southeast Side.

At the end of last year, the City responded to RMG's final permit application with a letter of deficiency. I wholly agree with this response. RMG's permit application is "substantially deficient." The deficiency letter underscores why the community and the City cannot trust that RMG will operate a new facility at the 11600 S. Burley site safely and that CDPH must not grant a permit to RMG for the new incarnation of General Iron on the Southeast Side. RMG has now resubmitted their permit, but the problems and threats to the surrounding community are still there. The city therefore must deny this new permit in order to protect the health and well being of the neighborhood.

During General Iron's tenure in Lincoln Park, they proved time and again that they are not a good neighbor with fires & explosions, City shut-downs, coating the neighborhood in toxic "fluff" and federal EPA citations. There is no reason to believe moving to a new neighborhood will put an end to these harmful practices.

The Southeast side is already environmentally overburdened, with manganese, petcoke and landfill pollution already impacting the health and safety of residents, and we must not continue to use the neighborhood as the City's dumping ground.

The Mayor promised environmental justice. To approve this move would be an injustice to the Southeast side. The City promised the Southeast side transparency, but passed one of two City permits without informing residents. It's time to follow through on these promises and protect all the Chicago communities, not just those on the Northside.

Thank you for your consideration,

Sincerely,
Jean-Stéphane Naas

Subject: RMG Proposed Site

[Warning: External email]

It is my opinion that the RMG proposed site will produce way too much truck traffic, trucks that will be required to travel through residential neighborhoods, such as the East Side, Hegewisch, South Deering and South Chicago. It appears that the only access to the proposed site will require trucks to travel down Avenue O, right past George Washington Elementary School and George Washington High School. There is also Annunciata Catholic Grammar School about 4 blocks east of Avenue O on 112th Street.

There will be no doubt that trucks arriving at the RMG site will be emitting unacceptable amounts of diesel emissions and noise pollution directly across the street from two Chicago Public Schools, schools that do not have the proper protection or soundproofing in place to reduce noise pollution. The schools do not have an air filtration system that would prevent diesel fumes/pollution from entering the school. The air and noise pollution will undoubtedly have an effect on students that might be outside for elementary school recess, high school physical education classes, or high school sports that are played at the adjacent Rowan Park. The Chicago Park District also sponsors outdoor and indoor sports for neighborhood children; the air pollution RMG trucks will create will be awful.

The new 10th Ward Manufacturing District on Avenue O has also created an increase in truck traffic and additional air pollution. With a steady convoy of trucks entering the RMG site at all hours of the day and night through a residential neighborhood will also be awful, but then again the owners of RMG don't live in any of the neighborhoods surrounding the proposed site.

I also believe there will be enormous pedestrian and vehicular traffic safety concerns. Traffic on Avenue O will be a major concern due to the amount of trucks. I don't believe Avenue O is a designated truck route nor was it constructed to sustain and support a daily convoy of heavyweight trucks.

The trucks around Washington High School are of great concern because there are many students that walk down Avenue O coming and going to school. Many students are dropped off at both the Elementary and High School creating heavy traffic near both schools.

Has RMG coordinated with CTA to help alleviate any possible traffic concerns for CTA Buses that drop off or pick up students at the High School? What about CPS buses that might be required to drop off or pick up students near both schools. Will there be an increased Police presence on both the local and state level to make sure that trucks driving through the neighborhood will meet or exceed all safety regulations, environmental regulations, obey all traffic laws, and are not depositing waste onto the streets that might create safety concerns for regular vehicular traffic. Is it possible to impose a fine on any potential violators and create a fund that will help schools or defray the costs of neighborhood improvements?

The truck traffic on 130th and Torrence has increased tremendously with the expansion of the Ford Plant. Very concerned about trucks using Torrence Avenue to 126th Street, then eastbound on 126th Street to Avenue O. Trucks will pass within a few feet of the Hegewisch Babe Ruth Field and blocks with the Hegewisch Little League Field, both of which have been found to contain hazardous waste. Then there is the bike and walking trails, the entrance to Wolfe Lake where families picnic and fish. It's horrible that the 10th Ward residents still live in an area filled with hazardous waste such as the infamous "coal hills."

It is my opinion that there are too many scrap yards, garbage dumps and other environmental hazards in our 10th Ward. It also appears that RMG is a done deal, no matter what, I believe there are alternative sites within the boundaries of the 10th Ward that will suit RMG.
