

IF YOU ARE PURCHASING A CAR SEAT:

Installing a car seat is a good first step in keeping a child safe while traveling in a motor vehicle. But a car seat won't be effective if it is not properly installed!

There is help available to anyone looking to install a car seat. The City of Chicago encourages consumers to use the services provided by Certified Child Passenger Safety Technicians.

Certified Child Passenger Safety Technicians are individuals who have completed and maintained a certificate in the 32-hour National Standardized Child Passenger Safety Training Course developed by the National Highway Traffic Safety Administration (NHTSA). This course is designed to provide the basis technical skills, experience and knowledge of the proper use and installation of child passenger safety seats.

Below is a list of Certified Child Passenger Safety Technicians in the Chicago area. Also, please refer to the NHTSA Child Safety Seat Inspection Station Locator webpage for the most current information. This webpage can be found at <http://www.nhtsa.gov/cps/cpsfitting/index.cfm>

A Child Passenger Safety Technician can assist you with proper installation of the car seat.
